#### WHO DID IT!

For the first time since the present office position tonk affice, thirteen tears ago, the main of New Mexico a unable to the in the full the saluries of his differra.

At the one of the fiscal year on inturday the state found Resif with Same \$15,000 to pay some \$26,000 worth of salaries. State employes. theire merenty per cent of what is Contaggie-thom and are now engaged In meladiously whistling for the bal-

Taxes are indefinitely tied up by illigation growing out of a widegrend protest against increases and monwalth. Why is it?

Are the Democrats telling us the truth when they declare that all the present troubles of the state government are due to the remissions of the Hepublican members of the state legislature?

SERBITORISE. For the first time in many years

state of New Mexico.

For the first time in many years the state is unable to meet its obliga- it does a merchant, tions. If it is not broke, it is at least badly bent.

And we were taught in the primary school, amongst other rudimentary arithmetical exioms, that two and two added together make four.

#### SPANISH AS A VEHICLE FOR ENGLISH.

The Herald recently published a comunication from Chrises W. C. Ward of Las Vegas, touching upon the importance of greater attention to the rural school work in New mg of the English language to the Sponish-American boys and girls.

cureful reading by friends of rural leaflet, will prove of immense value stand of discouraging the study of ef activity. correct Spanish and the use of Spanish in the schools the Latin tongue study of foods, including their prepshould be used as a vehicle for the aration and preservation, a discusamplettion of English.

muce in this county can testify. It books are also included. ing it was the word "caballo,"

Amin. If has been frequently the work of the board itself. pointed out that the New Mexican youth who starts out in life has the field of apportunity greatly extended when he is equipped to spenk and 4 write fluently both English and Spantab. Perfecting him in the one of the native tengue in which he already is grounded not only makes it ensier for him at the arme time to learn English, but donnies his linguidle equipment. If the average American boy could usit the grains chinery in 1913 amounted to more mag grades with the ability to speak | than \$14,000,000. and write two languages fluently bewould certainly regard it as a consideexable accomplishment.

If is asserted that even though the use of a Spanish word is forbidden in the school room, the boy "will not forget his nully tongue." As a matter of fact the boy knows his native sangue, at the age of six, just about of Baden and Wartemberg now emas well as the average American ploy 14,000 persons. youth knows the English language. And if we concede that he will not forest his native tengue, why not let ago.

him nequire is in its purity? We believe that if the Bernalillo county school teacher who talks Spenish fairly well will compare

American pupils of the present day through, I want to progress. I should to us the position in the world which iry the most progress in teaching

English to the native hope and gpm. Certainty, in a Spanish-American rural community, the superintendent or instructor who knows the native cost to the principle on which I have als tongue has a tremendous advantage over the one who doesn't in enlisting he co-operation of the fathers and mothers and school directors in giving the children on American edu-

#### IT PAYS TO ADVERTISE.

School census returns now completed in Senta Fe show that Nov Mexico's gain in population during the past year has been slight. Last year the school-age population-beween the eges of 5 and 21-was 101,045. This year it is 101,989 a gain of 344. It is estimated from this that the total population has inorewand 1.201.

How does that strike you, for a brand new, progressive, resourceful; rentern state?

In the castern countles a heavy falling off in population was noted in all counties except Union. Ten counties show a decrease in population, fifteen showing a slight incrohae.

What is the matter with New Moneo-a state of undoubted great agricultural, mineral, grazing, industrial and other posibilities?

Every other state in the west is Occumulation in the assessment of advertising. Every other state is The taxes. For this and other reasons telling the world about what it has the outlook for the coming year is to offer; is actively, aggressively and viewed with more or less alarm by successfully seeking settlers and inthose who look to the state of New vesters and developers. It is idle to Mexico for their regular stipend and say that this immense state has not ap all persons who are interested in resources to compete with the other the financial standing of the com- states. Yet we are advertising New Mexico only sparadically, spasmodcally, unsystematically and in a higgledy-piggledy manner. There is no organized state campaign to put New Mexico's attractions and possibilities before the country; the state is not furnishing statistics of any kind for the perusal of the thousands of egsterners who want to know or whose There are two salient facts in the interest could be aroused about what like a peaugit-roaster, the Sunshine State has to offer.

In business the man who tries to the Democrats are in power in the seep his wares a secret from the Milwaukee, Wis, successor to the on to the blame thing if some one people doesn't get very far. Adver- there is mighty little doing in the track. tising pays a state as big returns as Sun Cult line at Joliet, Iti.
